- Microsoft Office Suite

PROFILE

A Full Stack Web Developer from the Gold Coast with a **passion for learning and understanding new things**. I enjoy **Front End development** because it allows me to work on visually appealing designs and has a clear visual reward when the work is complete, while **Back End development** allows me to work on my fundamental programming knowledge and problem solving skills. Working in development has been an amazing experience because it has allowed me to **apply my learned skills from my hobbies to work** and visa versa. In my free time I enjoy building and working on my **home server(s)**, flying and building **FPV drones**, and playing **TEKKEN**.

WORK EXPERIENCE

Village Road Show Theme Parks

2023 - PRESENT

Junior Website Developer

Responsible for **development and release** of the new suite of Village Roadshow Theme parks websites, Including:

- Topgolf.com.au
- Movieworld.com.au
- Themeparks.com.au
- Wetnwild.com.au

Key Responsibilities

- Knowledge and understanding of the **NEXT Js** Framework using **TypeScript** with an emphasis on **Front End** development
- Basic Implementation of **Google Tag Manager** and **Google Analytics**
- Integration with Content Management System (CMS) **Contentful** and interaction with its API using **GraphQL**
- Use of **Atlassian** programs such as **Jira** for project management and **Bitbucket** for source control
- Liaise with Art, Brand, Media and Analytics teams to deliver websites that will champion the Village Roadshow brands and best deliver information to (potential) customers while adhering to strict policy and branding guidelines and release deadlines
